- Please note:
- 1) Many sidewalk project scores are equal based on criteria. Planning Level Cost Estimates are used to break ties in scoring to determine ranking (lower cost projects are ranked higher when scores are tied).
 - 2) All cost estimates are planning level cost estimates and are subject to change without notice based on new information including, but not limited to, results or findings from future survey, design, preliminary engineering, utility findings, or staff fieldwork or analysis. RDOT continues to update and input planning level cost estimates on an ongoing basis.
 - 3) Sidewalk Program only scores and ranks roadways that are designated at Collectors and Arterials type roadways. Sidewalk gaps on neighborhood or subdivision type streets are not ranked in this system.
 - 4) With new TSPLOST 2 being passed by voters in November 2021, RDOT is currently determining the project schedules (that may include sidewalks contained in this list) based on incoming monthly funding revenue generated over the 5 year window (starting in Spring 2022) to determine when projects can be designed and constructed. The tentative schedule will be reviewed by the Mayor and Council at a later TBD date.
