

# Community Project Federal Funding Requests

Proposed Project:

## Ace Sand Riverbank Restoration and Floodplain Protection

The City of Roswell is committed to preserving our waterways for future generations along the Chattahoochee River. The Ace Sand Project promotes riverbank restoration, protects the floodplain and creates river-oriented recreation opportunities for local, state and national visitors.

Project Elements: River Bank Restoration, Floodplain Protection, Invasive Plant Removal, Native Planting, River Recreation Access, Children's Interactive Storm Water Garden

Proposed Project:

## Doc's Café Renovation

The City of Roswell desires to expand our economic growth and tourism by incorporating the whole story of our community through the restoration of Doc's Café. The structure was a historic gathering place for African Americans in our community throughout the 20th century. The restoration of this facility will create an expanded interpretation and educational opportunity for the City of Roswell, in addition to preserving a building representative of our African American community heritage.

Project Impacts: Economic Growth, Heritage Tourism, History and Preservation, African American Representation

## Show Your Support

Community engagement and support is crucial in determining which projects are selected for federal funding. Only projects with demonstrated community support will be considered.

The City of Roswell asks that you show your support for these two separate proposals by visiting the [Community Project Funding Public Portal](#). Please include The City of Roswell as the "Community Project Applicant" and the name of the project proposal for which you are advocating, along with your thoughts on why the project should receive federal funds. If advocating for both proposals, two separate entries must be made.
